## IMAGING

- Multi Platform & Multi Device Enabled
- Seamless Integration of ePRO with EDC
- Smart Study Designer
- Enhance Patient Engagement
- Improve Data Accuracy with Robust Data Validation Checks
- Integrate Medical Dictionaries
- 21 CFR Part 11 Compliant
- Improve Regulatory Compliance
- Improve Data Quality & Accuracy

- Availability of Multi Lingual Option
- Increase Transparency of Due Diligence
- Engaging Learning Tools
- Interactive Multi-Media Components
- Digital Signatures
- HIPAA Compliant
- Overall Cost Efficient

- Standalone or Easy Integration with IWRS or EDC
- Secured Transfer of imaging Data over a Cloud Server
- Upload Big Volume DICOM and Other imaging
- Redaction of Patient Identifiers
- Systemic Nomenclature of imaging Files for Record Linkage
- Seamless Connection with Core Radiology Lab
- Integrated RECIST 1.1 Worksheet
- Structured Archival of imaging

- Centralized Database
- Real-time Project Insights
- Integrate Customized Workflows
- Timely Project Completion
- Easy & Efficient Conflict Resolution
- Optimal Allocation of Resources
- Electronic Signature

“

We implemented Octalsoft CTMS at Clianza in 2016 and it has transformed the way we manage our late-phase clinical trials. The system provides a comprehensive set of features that allow us to streamline trial processes and make informed decisions. From tracking study progress, managing site and patient data to generating reports, the system has everything we need to conduct successful clinical trials. What sets Octalsoft CTMS apart is its simple user interface. It is intuitive and easy to use. The ability to access the system from anywhere, at any time, has been a game-changer for us. The support we receive from the Octalsoft team has been excellent. They continue to be responsive and helpful whenever we have questions or need assistance. In addition to CTMS, we also leverage their IWRS system and we are quite satisfied with the tool and their delivery method.

”
