

Experience Excellence in eClinical Solutions

For a Healthier Tomorrow

Celebrating
15+ Years
of Simplifying Technology

Hiren Thakkar

HIREN THAKKAR

Managing Director

hiren.thakkar@octalsoft.com

“

We laid our first brick in the life sciences vertical in 2011, with the deployment of a clinical trial management system for a beta customer. After looking at our delivery, they expressed an interest in working with us on another tool- an Electronic Data Capture system.

We realized that not many companies offer an end-to-end integrated platform to manage clinical trials. Few companies who did were cost-prohibitive. To solve this unmet need, we shifted our focus from being a service to a solution provider and developed a comprehensive, efficient, and cost-effective eClinical platform.

We now have 12+ solutions added to our eClinical suite. Together these tools enable our clients in the life science and healthcare domain to effectively manage their clinical operations using a single, centralized database.

We can proudly say that with our eClinical platform, we have enabled technology for more than 60 life science companies across the globe. With constructive feedback from more than 5000 users, we intend to constantly enhance and upgrade our footprint in the life sciences and other parallel domains to become a life-long reliable technology partner for our customers.

”

Octalsoft offers cutting-edge eClinical software solutions

Octalsoft's solutions empower researchers, doctors, and pharmaceutical companies to streamline their workflows, improve data accuracy, and enhance time and productivity management.

We know you're on a noble mission to develop better, more effective treatment options for the people who need them, and we understand the challenges that come along with it.

Octalsoft steps up as your partner of choice. We're dedicated to providing unwavering support so that your life-changing treatments reach people around the world faster.

**OPTIMIZE TRIALS. STAY COMPLIANT.
SAVE COSTS.**

- Plan, conduct, and track trials efficiently
- Gain real-time insights into study status
- Track all vendors, expenses, and budgets online

**ELIMINATE BIAS. ENHANCE IP
SUPPLIES.**

- 100% configurable subject enrolment and randomization
- Manage global IP supply chains with 5X efficiency
- Algorithm-based subject medication dosing and dispensation

**CAPTURE. INTEGRATE. COMPILE
ALL DATA.**

- Smart study designer to set up the most complex studies
- Online collaboration to address data discrepancies
- Capture quality data with speed and accuracy

OPTIMIZE TRIAL TIMELINES FOR OPERATIONAL EFFICIENCY

COLLECT & MANAGE DATA. REDUCE ERRORS.

- Configurable ePRO designer with drag-and-drop capabilities
- Automated push notifications to enhance patient engagement
- Seamless integration with IWRS, EDC, eConsent, and other eClinical solutions

ORGANIZE & STORE FILES. BE INSPECTION READY.

- Flexible wizard-driven process for setting up e TMF
- Interactive reporting with a self-service approach
- Role-based access control

ELIMINATE TRAVEL. SAVE COST.

- Automated creation of subject-specific folder
- Interactive reports to track, check, and manage workflows
- Real-time dashboard to stay in the loop

eCONSET
by Cataloft

IMPROVE ENGAGEMENT. INCREASE EFFICIENCY.

- Customize according to your needs
- Access any time, from anywhere
- Multimedia content to enhance understanding

COLLABORATE. REVIEW. SHARE ONLINE.

- Create regulatory documents electronically
- Dynamic review and approval workflow
- Set expiration dates for CVs, licenses, and certifications

eDOCS
by Cataloft

**eClinical
Dashboard**
by Cataloft

VISUALIZE. MANAGE. IMPROVE OUTCOMES.

- Get a birds-eye view of the entire study
- Access real-time safety data to manage risk efficiently
- Track and analyze various performance metrics

CAPTURE. SECURE. TRANSFER.

- Transfer images at any time, from anywhere
- Upload big-volume DICOM files with a single click
- Automated alerts for DICOM uploads & downloads

**Medical
Image Transfer**
by Cataloft

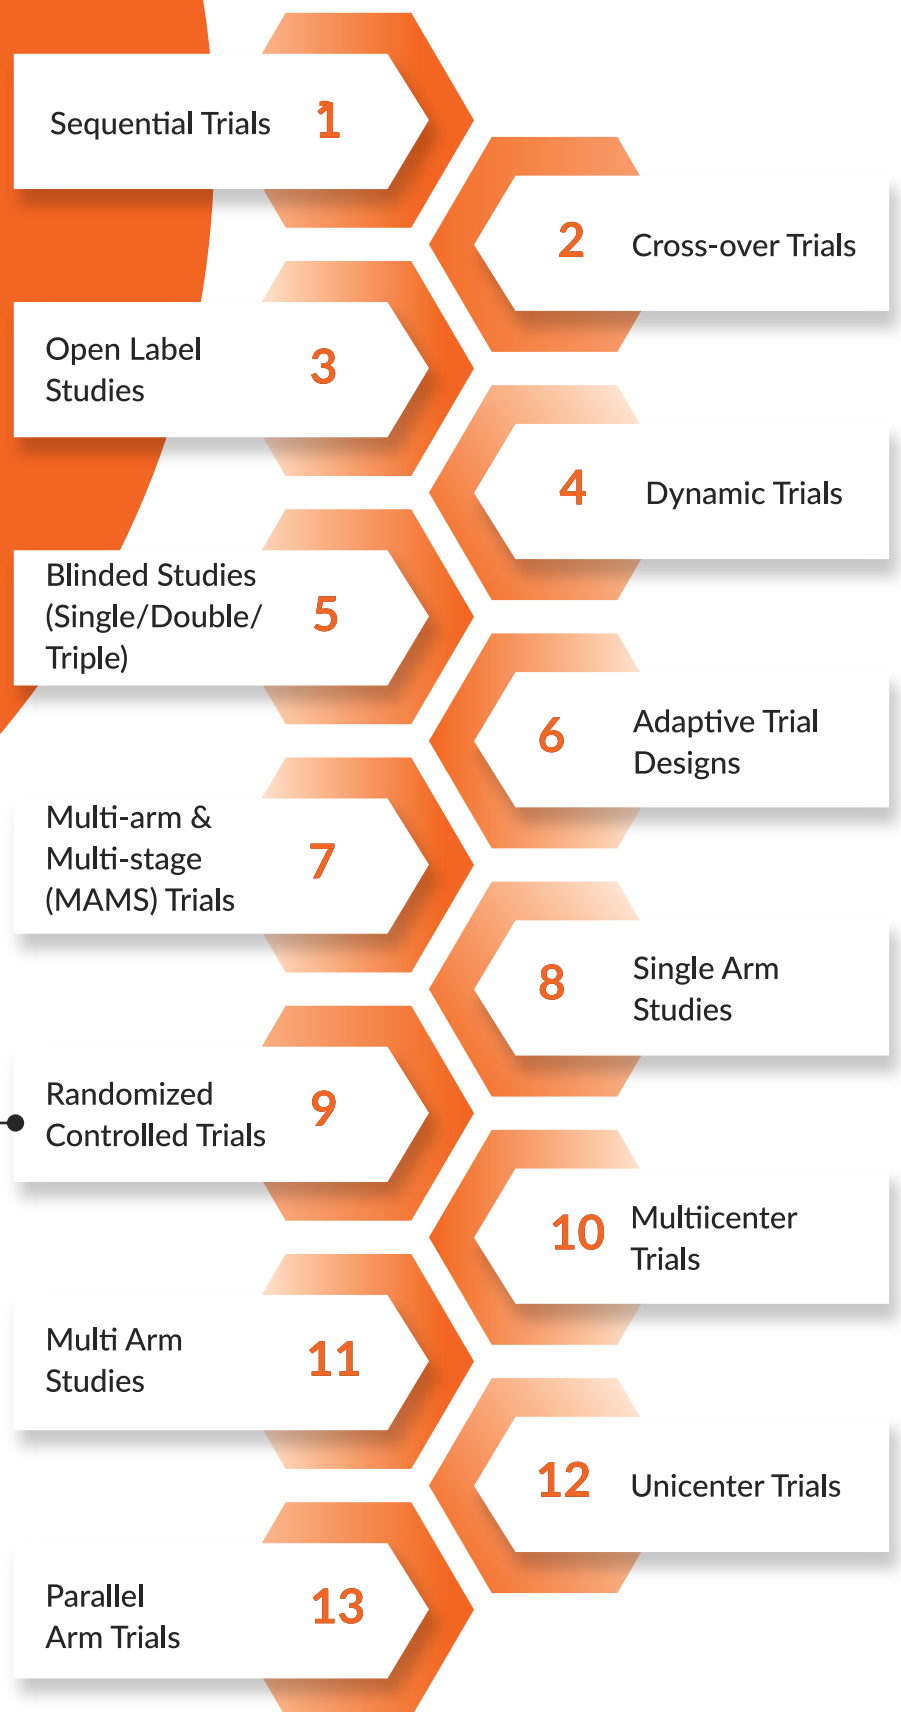

In Octalsoft, we found a true collaborator to manage supply chain and randomization of complex clinical studies through their digital technology platform & not just a software application. Safety of Human Subjects involved in the clinical study was always given the highest priority by Octalsoft while developing the platform along with data security, integrity and global regulatory compliance which are key building elements of this platform. We are sure about our long-term collaboration with Octalsoft and we look forward to working with them as we grow.

- Director, Seveillar

We understand that every trial is unique, with its own set of requirements and challenges. That's why Octalsoft's eClinical Suite is designed to be easily configurable, so you can make changes with evolving trial requirements and keep your trial on track. Our solutions cater to the entire spectrum of clinical trial design types.

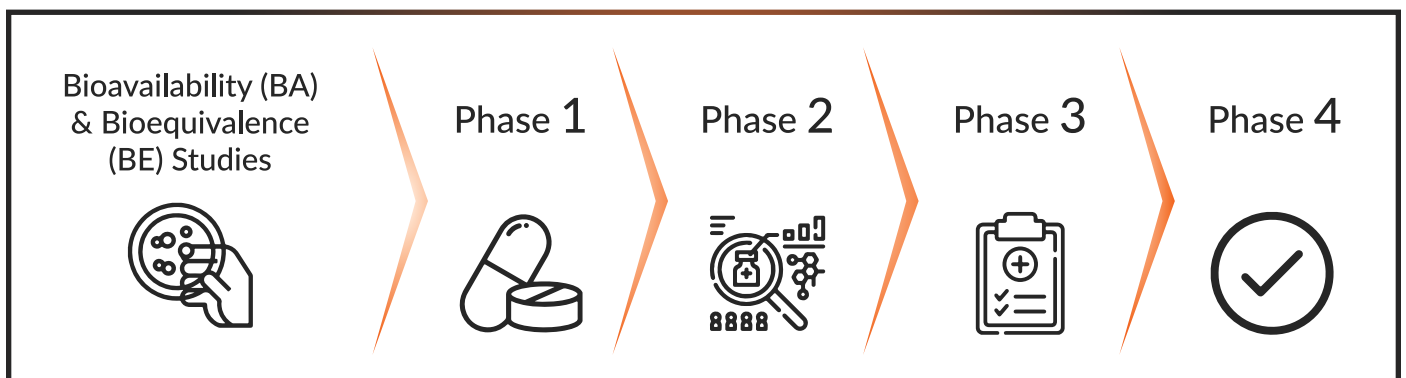

- ▶ Randomization Logic
 - Simple
 - Stratified
 - Permuted Blocks
 - Central
 - Site-specific
 - Covariate-Adaptive

COMPATIBLE WITH ALL PHASES

From the Pre-clinical Phase to Phase 4 and beyond, our suite of solutions is built to evolve alongside your clinical trial.

TEAM THAT IS DRIVEN TO DELIVER SUCCESS

With a cohesive cross-functional team of industry veterans dedicated to crafting solutions that result in 100% success across stakeholders, Octalsoft prides itself on the immense value of its human capital.

50+
Team comprises of members from 10+ Indian States

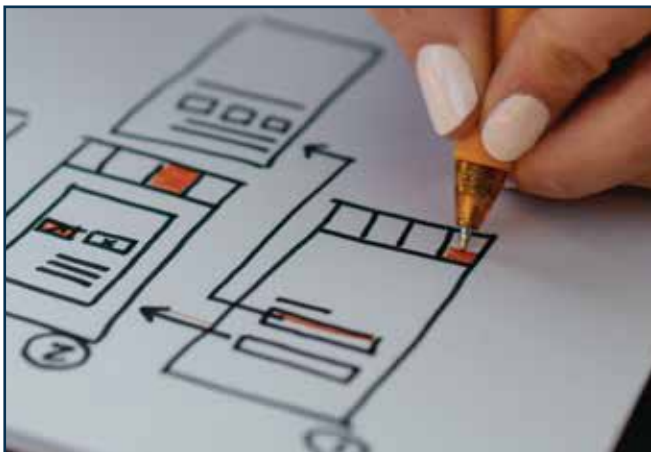

326+
Combined years of team expertise in the Clinical & Technology domain

Regardless of the study complexity, our solutions will meet your specific needs

EASILY CONFIGURABLE

Committed to delivering nothing less than excellence in everything we do, Octasoft's eClinical solutions match pace with the most cutting-edge developments in the sphere of global clinical trials.

INTUITIVE UI

Our intuitive user interface provides a seamless experience, ensuring that you can easily navigate through the software and complete tasks efficiently.

SEAMLESS INTEGRATION CAPABILITIES

With seamless integration capabilities, you can easily integrate our eClinical solutions with other systems, allowing for smooth data flow and efficient collaboration between teams.

WHEN YOU CHOOSE US,
YOU CHOOSE EXCELLENCE

You can now focus on advancing your research and improving patient outcomes.

UNPARALLELED CUSTOMER SUPPORT

Committed to delivering nothing less than excellence in everything we do, Octlasoftware's eClinical solutions match pace with the most cutting-edge developments in the sphere of global clinical trials.

COST-EFFECTIVE

Our solutions are designed to save your money without sacrificing quality.

HIGHEST COMPLIANCE

We know compliance can be a daunting task, but with our eClinical suite, it's one less thing you have to worry about.

We are compliant with the highest regulatory guidelines

OUTCOME-DRIVEN INDUSTRY EXPERTISE

Our prime goal is to deliver not just next-gen technology but a better quality of life for the patient as our primary goal. Leveraging 15+ years of vetted industry expertise, our sphere of operations includes, Biologics | Biotech | Medical Device | Contract Research Organization | Central labs | Hospital | Pharma

**Dr. Nafisa Kathiwala,
QA Lead & Subject Matter Expert**

"Octalsoft's eClinical Suite offers its customers a decentralized and unified platform that brings people, processes, and data under a single source of truth. At Octalsoft, we believe in tailoring the systems to your specificities since one size does not fit all. The SME team collaborates closely with the client to understand their requirements and concerns and come up with the best solution in terms of regulatory mandates, simplified UI/UX for complex projects, smart study eCRF designer and edit checks, validated randomization sequences, automated clinical trial supplies management, and robust collaboration platform for project execution and real time project overview. Over and above, we consider the client's need for speed, usability, interoperability with other systems, and overall ROI. Octalsoft's eClinical Suite is designed with the end users in mind and is apt for sponsors, CROs, central labs, central depots, and clinical research sites that simultaneously conduct multiple studies in multiple locations"

 <p>PHARMA Industry</p>	 <p>MULTIPLE Therapeutic Area</p>
 <p>INDIA Location</p>	 <p>MULTIPLE Regulatory Submission</p>

CLIENT REQUIREMENTS

- Required an integrated platform (EDC, IWRS, rSDV, CTMS and eTMF, Mobile application) to deploy multiple projects across different therapeutic areas and locations for submission to various regulatory bodies.
- Mobile enabled dashboard collating critical data points in real-time from the eClinical suite for strategic insights to the top management.
- Improve Document Management and Quality Processes through eTMF solution
- Facilitate mid-study changes to accommodate protocol amendments after go-live and a highly responsive customer support system.
- Robust IWRS system for complex randomization and dispensation logics.
- Perform remote source data verification and centralize monitoring efforts.
- Extraction of Statistical Analysis System (SAS) ready and CDISC compliant subject data listings from the application in excel, csv, PDF, and xpt file format

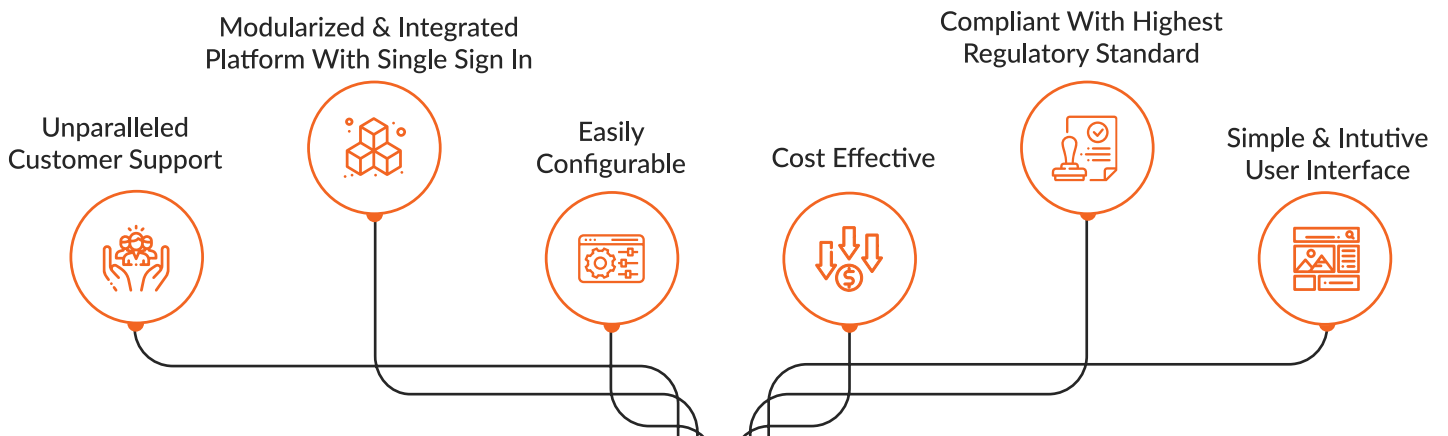

OUR SOLUTION

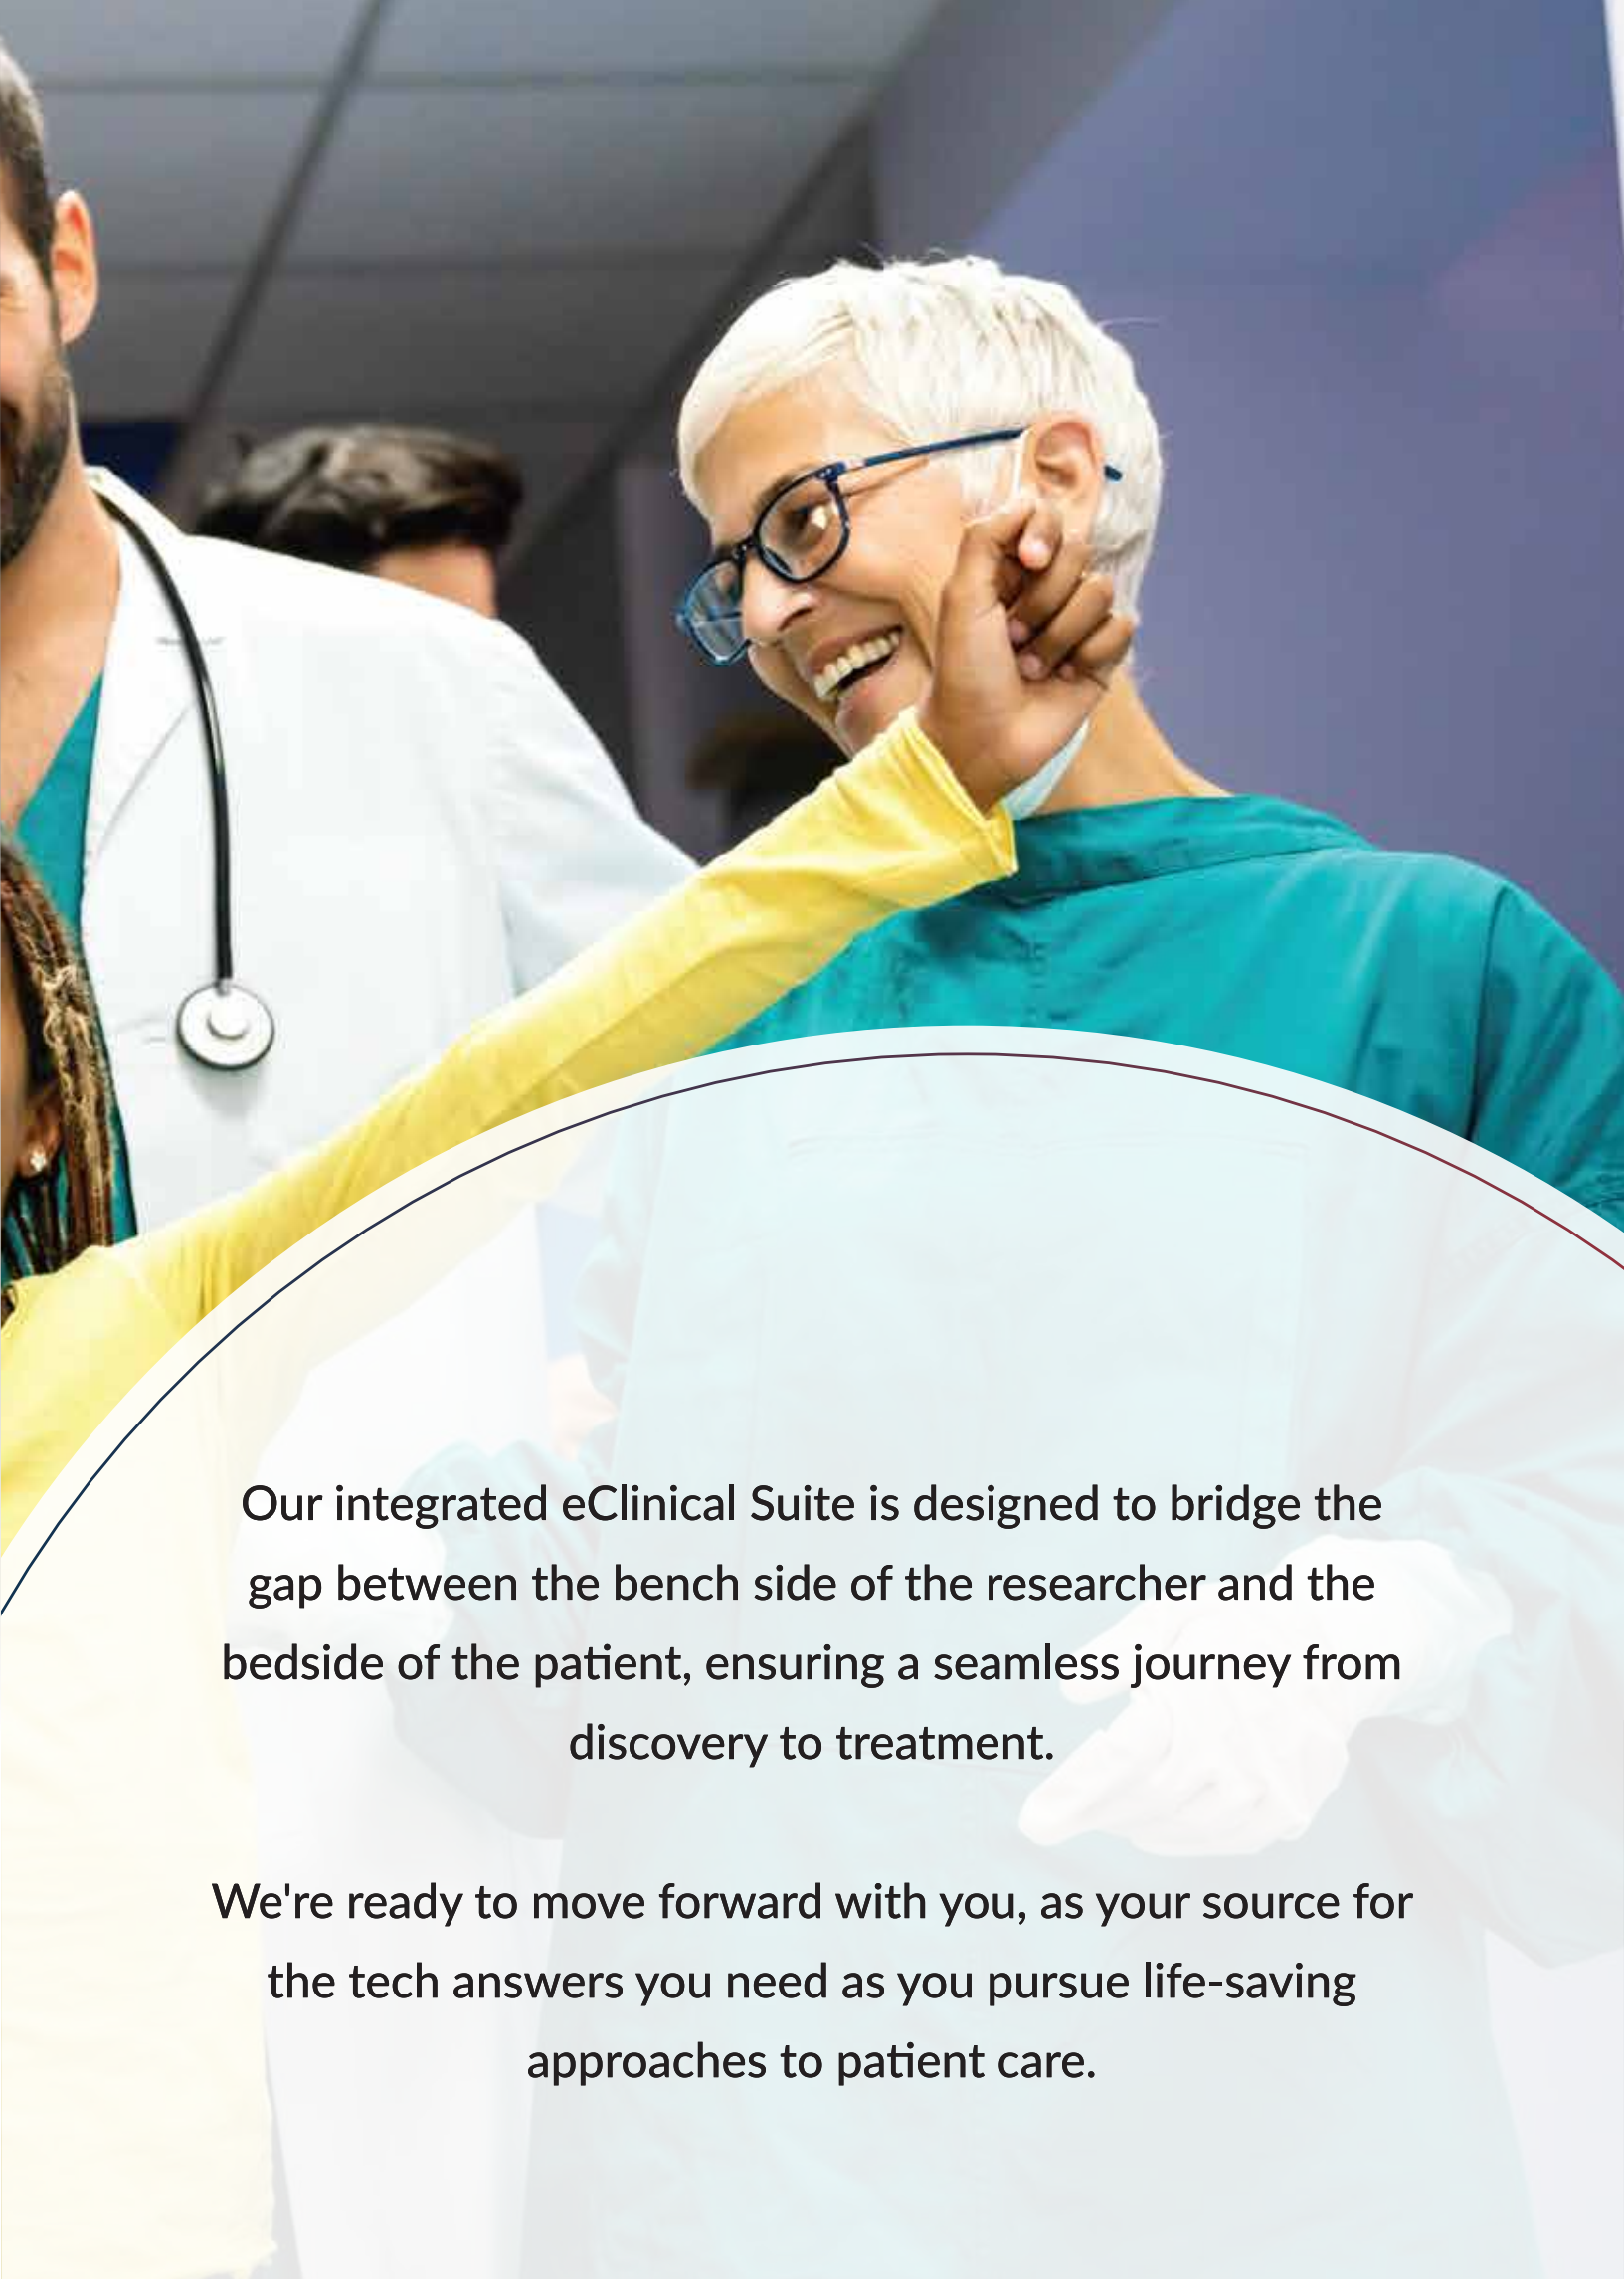

- Achieve the client project objectives in the given timeframe using an agile development methodology
- Reduce on-site monitoring time, costs and efforts by utilizing the rSDV module.
- Provide a standardized repository of generic eCRF designs for rapid study startup, and re-usability across various newly added studies.
- Enhance user experience by providing a single sign-in functionality to access the unified eClinical suite.
- Integrate coding of medical dictionaries for standard classification of medicinal products and medical conditions/events.
- Provide a cost-effective and highly efficient integrated solution within the given timeframe

GOALS ACHIEVED

- Better UI with simple & intuitive navigation with logical input controls
- Integration with central lab data and normal reference ranges
- Graphical representation of study status and subject data
- Dynamic & real time eCRF report creation for ready regulatory submission
- Bulk coding functionality for medical dictionaries
- Automation in study designer module, such as defining null value edit checks
- Configurable eTMF with color-coded dashboard

A photograph of a woman with short white hair and glasses, wearing a teal lab coat and yellow gloves, pointing at a tablet held by a man in a white lab coat. The background is a blurred hospital setting. A large white circular graphic is overlaid on the bottom half of the image, containing text.

Our integrated eClinical Suite is designed to bridge the gap between the bench side of the researcher and the bedside of the patient, ensuring a seamless journey from discovery to treatment.

We're ready to move forward with you, as your source for the tech answers you need as you pursue life-saving approaches to patient care.
